

# Issues Document

## Complete Website Capstone

### HTML Issues Found and Fixed

1. **Non-semantic markup**: used instead of semantic tags. Replaced with **<header>**, **<section>**, **<footer>**, **<main>**.
2. **Missing navigation** no **<nav>** on any page. Added consistent nav with 4 working links to all four pages.
3. **Missing <meta charset>** no encoding declared. Added **UTF-8** to all pages.
4. **Missing lang attribute** added **lang="en"** for accessibility.
5. **Missing alt text** added descriptive alt text to every image.
6. **Missing data table**: Skills section was plain text. Added a proper **<table>** with **thead/tbody**, 4 rows, 2 columns.
7. **Incomplete form** only 2 unlabelled inputs, no validation. Added **<label>s** linked via **for/id**, expanded to 5 input types, added 3 validation attributes (**required**, **pattern**, **minlength**).
8. **Missing third project**: Projects page only had 2. Added the third.
9. **Plain-text email** converted footer email to a clickable : link.

### CSS Issues Found and Fixed

10. **Missing navigation styling** added flexbox layout, hover pseudo-class, link styling.
11. **Poor colour contrast (hero)** lightblue bg nearly failed WCAG. Changed to #cfe8f3.
12. **Poor colour contrast (footer)**: plain gray measured 3.95:1, below the 4.5:1 minimum. Darkened to #4d4d4d, now 8.45:1.
13. **Misaligned header** added **display: flex** with **justify-content: space-between**.
14. **Wrong footer alignment** changed from left to **text-align: center**.
15. **Missing table styling** added border, padding, header background.
16. **Missing box model demonstration** added deliberate margin/padding/border across .intro, table cells, form inputs.
17. **Limited selector variety** added element, descendant, combination (th, td), and :hover pseudo-class selectors.
18. **Oversized hero image** added max-width and centered it.

**Total: 18 issues identified and resolved** across semantic structure, accessibility, form validation, and styling.
